## "Stigma is Recovery's Biggest Enemy"

Tricia Bishop and Heather Bush

Utah Department of Health Syringe Exchange Program

Drug-related stigma affects all elements of society, from the community, addiction professionals to the drug users themselves. The stigma felt by the drug user impacts their health and ability to find a successful personal path to recovery. This workshop will explore some of these issues and ask us to look at ourselves and our own stigmas and biases and how we can use this awareness to reduce stigma and encourage recovery.
